

Week 13:

Learning Materials: The this Pointer, Runtime Type Identification and casting Operators, Namespace, Conversion Function, Miscellaneous Topics, Standard Template Library

Task 1:

Fill an array with even numbers and a set with odd numbers. Use the merge() algorithm to merge these containers into a vector. Display the vector contents to show that all went well.

Task 2:

Create a namespace my_namespace. Show that under this namespace you can define an identifier again which is declared elsewhere.
